**Response:** The property upon which the biodiesel facility was constructed and operated had been used by OUW for grain storage as had the adjacent property for many years prior to the deed to IEO and construction and operation of the biodiesel facility. No manufacturing operations were conducted on the property or adjacent property. The only activity was the storage of grains. The biodiesel facility was constructed on the property acquired by OPDA from IEO.

- c. Provide a brief summary of the activities conducted at the Site while under Respondent's ownership or operation. Include process diagrams or flow charts of the industrial activities conducted at the Site.

**Response:** IEO conducted a biodiesel refining facility.

- e. Provide all documents pertaining to sale, transfer, delivery, and disposal, of any hazardous substances, scrap materials, and/or recyclable materials to this property.

**Response:** To the best of the knowledge of OUW, there were no such deliveries to the site except chemicals and compounds used by IEO in its biodiesel refining operations and other chemicals and compounds which may have been used by operators after IEO. OUW, to the best of its knowledge has no documents responsive to this request.

- f. Provide all information on electrical equipment used at the Site, including transformers or other electrical equipment that may have contained polychlorinated biphenyls (PCBs).

**Response:** Avista provided electrical upgrades to the property at the time the biodiesel facility was constructed. The precise nature of the improvements are known to Avista.

- g. Provide information on the type(s) of oils or fluids used for lubrication of machinery, product fabrication, or other industrial purposes, and any other chemicals or products which are or may contain hazardous substances which are or were used at the Site for facility operations and/or production at the Site.

**Response:** To the best of its knowledge, OUW does not have this information.

- h. Provide any site drainage descriptions, plans or maps that include information about storm drainage which includes, but is not limited to, above or below surface piping, ditches, catch basins, manholes, and treatment/detention or related structures including outfalls. If available, also include information about connections to sanitary sewer.

**Response:** Transmessis Columbia Plateau, LLC is believed to be the last tenant or lessee of the property from OPDA. The precise dates of its tenancy and occupancy of the property are known to OPDA. To the best of RGG's knowledge, Transmessis operated the biodiesel facility after IEO ceased business and vacated the premises sometime in 2012 or 2013. The IEO bankruptcy was converted to a Chapter 7 in January 2013 so it would not have been able to operate the biodiesel facility after that point. After 2012, 1138, LLC became the majority interest holder with over 75% of the ownership. 1138, LLC thereafter operated the business of IEO and managed its affairs. OUW does not have information on the ownership of the other entities that were member owners of IEO except Wally Kempf and Joel Edmonds are believed to have been the owners of 1138, LLC and Fred Fleming is one of the owners of Reardan Seed Company.
